

REPAIRS AND REFURBISHMENT

Film Gear Repairs

At **F.G.R.** we are all about the repair, maintenance and refurbishment of film lighting equipment. Having worked in the high paced world of film and television production for many years, we know how important the upkeep and reliable operation of your gear is.

Refurbishment of older style/genre lamps is a very much loved aspect of the **F.G.R.** operation. From the Redhead/Blondie that's been in the back of the van/studio because it's just too sad, to those great older studio lamps which just need a little bit of love. Bring them in and we will have them up and running like the day they walked out the factory!

Refurbishment of:

- Old/New Lighting Fixtures/Lamp Holders
- Practical period Lights and accessories
- Plugs and Sockets
- Single and Three Phase Mains Cable
- Header Cables/Header Sockets and Plug ends
- Weiland/Socoplex Cable and Ends
- Circuit Breaker/RCD's/Switches and Control Devices
