

WEATHER PROTECTED SWITCH GEAR

Film Gear Repairs

At **F.G.R.** we know how important it is to have quality **Weather Protected Switch Gear** in the variety of conditions we are constantly working in. All products in the weather protected range are impact resistant, and come complete with a mechanism shroud for additional protection.

For switchboards, generators, factory outlets, air conditioners or truck and van power. In fact, anywhere switchgear requires protection from the weather, our **Weather Protected Switch Gear** range and accessories are perfect for the job.

The tried, tested and hardwearing Weather Protected Series comes packed with features and a rugged, compact design that's perfectly suited to Australia's conditions.

Built tough for hard wearing applications and extreme climate conditions, our weatherproof range is perfect for situations where switchgear requires extra protection from the elements.
